

Strengthening Long-Term Care: Upskilling and Reskilling the Workforce

Care4Skills is dedicated to enhancing the skills of Long-Term Care (LTC) professionals, focusing on digitalisation and person-centered care.

The project aims to provide LTC workers with the tools and resources to adapt to evolving care demands and improve care quality across Europe.

Key Focus Areas

Person-Centred Care

Care4Skills promotes a person-centred approach, ensuring that care receivers are at the heart of care decisions, fostering dignity and independence.

Digital Skills

Our training programmes help LTC workers improve their understanding and use of digital tools and assistive technologies so that they can provide high-quality care in a digital age.

Co-funded by
the European Union

Target Groups

LTC Professionals seeking to enhance their skills in digital care and person-centred practices.

Care Managers and Administrators looking for resources to improve care operations, compliance, and staff training.

Training Providers and Educators developing training programmes for LTC staff who need innovative, up-to-date resources and methodologies.

Families and Informal Caregivers looking for information on best care practices and assistive technologies.

Rapid Response Training Programme

This free online training is designed to equip LTC professionals with essential skills including:

- Digital skills for using health monitoring systems and assistive technologies.
- Practical knowledge of person-centred care.
- Strategies for improving communication and emotional support for care receivers.

Join our Large Scale Partnership!

Care4Skills fosters collaboration and knowledge sharing among LTC professionals, training providers, policymakers, and researchers. By working together, we can strengthen the LTC workforce and create a future where high-quality care is accessible to all. Contact: orazio.fiorini@easped.eu.
